-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 11-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "plate-like" is not clear as to what the term "like" is referring (i.e. the metes and bounds of the term plate is not clear because the modifier term "like" is not clearly defined for what it encompasses). It appears that the phrase "plate-like" would be more clear if it read as --plate--.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11, 12, 19, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Bacher et al. (US 5,194,834) cited by applicant.

Bacher (e.g. see Fig. 5) teaches a coaxial attenuator including: a resistive part includes a plurality of plate parts (e.g. see Fig. 4B) connected/fixed to the inner conductor with springs (41); and the resistive part engages cylindrical grooves in the outer conductor (e.g. see 40 in Fig. 5).

5. Claims 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Weber et al. (US 2,689,294)(cited by applicant).

Weber teaches a coaxial attenuator including: a resistive part formed of two resistive plates (9') connected and fixed to the inner conductor (e.g. see Fig. 8).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nesses teaches a coaxial attenuator.
